

Power is in the Product

Fast Facts

Factory Mounted Equipment Controls
Pre-Engineered Control Sequences
Optimized HVAC Systems
Intuitive User Interface
Built-in Graphics, Trends, & Alarms
Plug-and-Play Installation
Delivered by Authorized Carrier
Controls Experts

i-Vu® System

- Easy to install and commission
- Pre-engineered control programs simplify system set-up and minimize the need for field programming
- Built-in system strategies eliminate the need for expensive system coordination modules
- Integrated energy-saving strategies ensure cost-effective system operation
- Intuitive, graphic-rich i-Vu user interface keeps you connected to your facility from any web-enabled device or locally through a wall-mounted touchscreen
- Auto-generated graphics give users total insight and control of Carrier equipment
- Single-source delivery of equipment and controls

CONTROLS EXPERT

Powerful HVAC control delivered by Carrier equipment experts

Carrier delivers optimized HVAC solutions that integrate world-class equipment with controls, creating a seamless system that is easy to understand, monitor, regulate and change.

The i-Vu® building automation system (BAS) brings the big picture into sharp focus with a 360° view of your building's heating, ventilation and air conditioning (HVAC) system. Facilities staff can stay connected to their system around the clock, responding quickly to everything from hot/cold concerns to alarm conditions.

With i-Vu, you can protect your investment in equipment and controls by choosing a factory-authorized Carrier Controls Expert Certified Contractor. The Carrier Controls Expert program trains and certifies an elite class of contractors and technicians who install and service the i-Vu building automation system in commercial buildings, ensuring that your HVAC system is properly maintained.
