**côr™**

HOME AUTOMATION

*The heart of a smarter home.*

# Product Data

## OVERVIEW

The 7" TouchScreen provides a new way to interact with the Côr Hub. Accommodating up to four 7" TouchScreens per hub, Côr system owners can control their system from multiple locations throughout their property.

The 7" TouchScreen connects to the Côr Hub wirelessly via Wi-Fi® and features an icon-operated interface that's nearly identical to the Smart Home mobile app. The common interface between the TouchScreen and the mobile app helps to reduce operator learning time and improve the overall user experience.

The 7" TouchScreen provides at-a-glance visibility to system status and easy operation through an icon-rich interface. It also provides audible signals to indicate when the system is in an arming/disarming sequence and will siren when the system is in alarm.
